

AT&T Mobility • Atlanta, GA

CriticalSpace Solutions completed design/build services to implement the Crisis Management Operations Center (CMOC) and Executive Emergency Response Center (EERC) for AT&T Mobility. The display wall pictured is a 2x5 array of 50" rear-projection cubes. CriticalSpace Solutions served as the client representative for the overall design and implementation of all technology, millwork, lighting, consoles, and acoustical treatments. This project was the last center of five, and the overwhelming success of this project led to CriticalSpace Solutions' involvement in future projects throughout the country for AT&T Mobility.
