

## Piedmont Natural Gas • Charlotte, NC

CriticalSpace Solutions completed design/build services to implement the control room display system for Piedmont Natural Gas, based in Charlotte, NC. The display wall is a 3x2 50" Christie wall with a Christie display-wall processor. The design incorporates the ability for operators to share their desktops on the wall via RGB insertion and also full-video system control via a Crestron control system. CriticalSpace Solutions and Command and Control Environments consulted with the architect and end-user on the control room design including acoustics, mechanical, electrical (including lighting), furnishing and storage, and outside lighting control.
