Industry Veteran Robert Cameron Joins the CriticalSpace Solutions Team

Norcross, GA, January 31, 2008 – CriticalSpace Solutions, one of the nation's leading collaborative visual communications integrators, is pleased to announce that Robert Cameron has joined the team in a project development role.

Mr. Cameron's extensive resume in the technology and design worlds includes positions at Fowler Communications, Spectrum Data Systems, Caribiner International, and SPL. In 2000, Mr. Cameron moved to realign his general technology experience to focus on the pursuit of command-control/mission-critical projects. As Director of the Control Room Group at MCSi, Robert worked with many of the regional offices to brand and develop the company's control room market. In addition to heading up this vertical group, Mr. Cameron has had the opportunity to work with several nationally recognized companies designing and developing AV and console solutions for companies such as AT&T/Cingular, the Southern Company, the Nuclear Regulatory Commission, and the FAA. Most recently, after stepping away from his focus in the mission-critical market, Robert had been the co-director of the Corporate Solutions Group at Atlanta's Multi Media Services where he had been responsible for the growth of the company's corporate integration group.

"Robert brings a wealth of industry experience and maturity to our organization, and we look forward to his contributions and success," noted Tyler Bonner, director of CriticalSpace Solutions. "As we continue to grow, we're confident that Robert will play a significant role in shaping our strategy. It's a pleasure to have him on our team."

CRITICALSPACE SOLUTIONS

Mr. Cameron did not waste time making an impact – through his initial efforts, CriticalSpace Solutions is already pursuing a number of emergency operations center/911 opportunities throughout the southeastern United States. His future plans include managing CriticalSpace Solutions' presence at the APCO (Association of Public-Safety Communications Officials) conference in Kansas City in August.

ABOUT CRITICAL SPACE SOLUTIONS

CriticalSpace Solutions, a member of the Technical Innovation family of companies, provides consultative design services and design-build collaborative video communications integration services for mission-critical, 24/7 environments, including control/communications centers, emergency response organizations, and monitoring facilities.
